Case Management / Supports Coordination

Meet with your Case Manager in the community, at home, in an OCHN office, or virtually.

Connecting You to the Right Resources

Case managers help coordinate assessments, services, and community resources to support independence, recovery, and overall well-being.
Services are tailored to each person's strengths, needs, goals, and level of care.

Assessment & Care Planning

Assessments help identify your needs and guide the development of your Individual Plan of Service (IPOS) or Person-Centered Plan. Your case manager works with you to create and update a plan that reflects your goals and priorities.

Ongoing Support & Advocacy

- Regular plan reviews and updates
- Guidance navigating service providers
- Information about your rights and choices
- Assistance staying connected to services
- Ongoing outreach and support
